

Dear FCMoD Member,

We are excited to announce an enhanced reciprocity agreement with the Denver Museum of Nature and Science as an added benefit to our membership program. The goal of the reciprocal membership program is to encourage members of both institutions to experience more of the rich museum experiences available to them in the State of Colorado. This agreement began with the new year, and will continue through 2014. We will review this agreement annually to be certain we are providing the best possible level of benefit with regard to this special partnership with the Denver Museum of Nature and Science.

With the new agreement, all FCMoD and DMNS **Family Plus level members and above** will receive free general admission, store discount, and member discounts on theater shows. It may exclude admission to temporary and special exhibitions, since contracts with third party lenders may prohibit such an arrangement. Any discounts that may apply will be handled on an ad hoc basis as contract with third parties permit.

Please note we are replacing the Discovery Passport level with the Family Plus level to add congruity with our partner, DMNS. If you are a current Discovery Passport member, you will be treated as a Family Plus level member in terms of this agreement, until you renew your membership. If you purchased a Family level membership in the past year, and you wish to take advantage of this newly enhanced benefit, we will provide you the opportunity to upgrade at a prorated rate to the Family Plus level or higher.

Once again, we are happy to provide this unique benefit to our members. Our proximity to the Denver Museum of Nature and Science and their willingness to partner with us in this special way, provides a great opportunity for both institutions and their members.

Sincerely,

The FCMoD Membership Team
