

Virtual Little STEAMers Caregiver Checklist

Before the Program:

- Read through the *Little STEAMers and Me* social story with your child to help prepare for the experience.
- Set up your technology using these instructions: <https://youtu.be/-s76QHshQnY>
- Unpack the materials in this Program Materials kit. If you purchased a Craft Kit, unpack those materials as well.
- Prepare and set up the materials using the instructions provided, in advance of the program.

During the Program:

- This is a caregiver-child class, meaning it is designed for you to do alongside your child. Please participate with your child for the duration of the program.
- Sign into the Zoom class using your *child's name*.
- Remind your child of the “green circle/red stop sign” system. When the teacher has a green circle showing, it means that it’s the class’s turn to talk. Children may physically raise their hand, and the teacher will call on them. If the red stop sign is showing, it means it’s the teachers turn to talk. The teacher will not call on raised hands during this time. (We will go over this system with you and your child at the beginning of the class as well.)

After the Program:

- The teacher will stay on the call for 5-10 minutes following the end of the class for additional questions, stories, and connections. If your child has any lingering thoughts, encourage them to share during this time.
- Help your child complete the craft at a time that works for you.

Thank you so much for joining us!
