

Let's Discover!

Fort Collins Museum of Discovery is thrilled to announce four special exhibitions slated through summer 2025. Mark your calendars!

FCMoD is excited to announce *Alebrijes*, a two-part community building experience set for November 29 – December 7, 2023 and March 11 – 31, 2024. Working with artists Óscar Becerra Mora and Rubén Mica from Mexico City, Mexico, visitors will experience the hands-on process of creating alebrijes through traditional methods, all while learning about the history, mythology, and culture that surround these imaginative creations. Get ready to explore, imagine, connect, and create!

In the fall and winter of 2024, FCMoD will bring science, history, and culture directly into your hands with two world-class exhibitions: *skin: living armor, evolving identity* from October 12, 2024 – January 26, 2025 and *The bias inside us* from November 30 – December 31, 2024. From the biological exploration of skin across an array of organisms to better understanding the science of bias, these unique, special exhibitions are sure to inspire wonder, curiosity, and conversation for all ages.

Did you know? All special exhibitions are included in the price of general admission.

NATURE all around us challenges the notion that urban and natural environments are separate or at odds by showing the many ways they are inextricably linked. The exhibit encourages further curiosity and learning about planning, designing, and managing to nurture nature in our own communities. Experience this incredible exhibit at FCMoD from May 24 – August 31, 2025.

It takes a big network to support and amplify the impact of FCMoD's annual special exhibition program. Special exhibitions provide opportunities for the community to interact with timely, meaningful topics that are deeply relevant to Northern Colorado. Curious about how to support? Contact development@fcmo.org to learn more.
